Education

Saint Jean Engineer — Eyang, Yaounde, Cameroon
Engineering degree in Computer Science and Information Systems — *September 2023 — October 2028 (Expected)*

Experience

Python/Odoo Developer Intern — June 2025 — September 2025
N2T SOLUTIONS SARL — *Yaounde, Cameroon*

- Led the technical migration of the Kribi Autonomous Port's core ERP (Odoo 8 to 17), ensuring zero downtime for critical operations that support over **500 daily users**.
- Customized and engineered Python-based Odoo modules using ORM and PostgreSQL, streamlining complex operational workflows and cutting processing time by **30%**.
- Managed end-to-end regression testing and the migration of over **100,000 records** with **100%** data integrity, effectively resolving legacy bugs across all updated modules.

IT Intern — June 2024 — August 2024
SEJOCE SARL — *Douala, Cameroon*

- Stabilized the company's IT infrastructure and core business applications, sustaining a **99.9%** system uptime to support daily distribution operations without interruption.
- Overhauled digital inventory tracking and data management, achieving **100%** accuracy in product, stock, and administrative electronic records.
- Revamped internal IT support processes to deliver rapid resolution of hardware and software issues, providing reliable technical access to more than **50 employees**.

Personal Projects

AKIBA | *Next.js, Express.js, Node.js, TypeScript PostgreSQL*, React Native

- Architected a full-stack professional services marketplace, successfully connecting customers with a network of over **200 verified service providers** nationwide.
- Built a highly efficient service discovery and matching engine that streamlined the user experience and drove a **40%** increase in booking conversions.
- Developed the platform simultaneously for web and mobile, delivering a highly responsive and unified user experience across all devices.

We Choose! | *TypeScript, Go, PostgreSQL*

- Developed a secure, university-wide online voting platform that reliably processed elections for a student body of over **3,000**.
- Designed a fraud-resistant, intuitive voting workflow that provided transparent and seamless ballot casting.
- Automated the entire election lifecycle from candidate management to result tallying, cutting administrative overhead by **60%**.

Technical Skills

Languages: Python, Java, C, Go, JavaScript, TypeScript, SQL, HTML/CSS
Frameworks: Spring Boot, React, Next.js, Node.js, Express.js, Django, FastAPI, Angular
Mobile: React Native, Flutter
Databases & Brokers: PostgreSQL, MySQL, MongoDB, Redis, Kafka, Vector Databases
Cloud & DevOps: Docker, Kubernetes, Terraform, Google Cloud Platform, Git, GitHub Actions, CI/CD, Linux
Testing & Tools: JUnit, Mockito, Jest, Postman, Prometheus, Grafana, Maven, Gradle, VS Code, IntelliJ IDEA
Core Concepts: Microservices Architecture, gRPC, REST APIs, Security (OAuth2/JWT), Data Structures, Agile/Scrum
